

MODULE NAME: WEDE5020

MODULE CODE: WEB DEVELOPMENT

STUDENT NUMBER: ST10519363

STUDENT NAME: BUSISIWE NGWENYA

The proposal I chose is the first one about a restaurant

1. Organisation Overview

- Name: Crave Corner food vendor
- Brief History of Crave Corner

Crave Corner was founded with the straightforward objective of giving everyone access to fresh, delectable, and reasonably priced cuisine. The company was founded on a love of cooking and using delicious cuisine to unite people. With an emphasis on high-quality products and welcoming service, Crave Corner gradually expanded its menu to include a range of entrees, snacks, sides, and drinks.

Today, Crave Corner strives to fulfil every craving by offering patrons delicious food, practical service, and a friendly atmosphere.

- Mission Statement

Our goal is to satisfy every customer's hunger by offering fresh, delectable, and reasonably priced cuisine together with dependable, kind service.

- Visual Statement

Our goal is to establish ourselves as a reputable and beloved food company that offers top-notch cuisine, first-rate service, and unforgettable experiences for our patrons.

- Target Audience

Crave Corner targets a wide range of customers, including:

Students and young adults looking for affordable and convenient meals.

Working professionals who need quick and tasty food during busy days.

Families looking for meals that everyone can enjoy.

Residents who enjoy fresh and affordable food.

Food lovers interested in trying different meals, snacks, sides, and drinks.

The business mainly focuses on customers who value affordable prices, good quality food, convenience, and friendly service.

2. Website Goal and Objectives

- Specific Goals for the website

1. Boost online visibility: Establish a website where clients can quickly find Crave Corner and discover more about the company.

2. Display the menu to give clients a clear understanding of the meals, snacks, sides, drinks, and costs that are available.

3. Make ordering simpler by letting customers browse the menu and easily reach the checkout and order procedure.
4. Enhance customer communication by offering a contact and inquiry site where clients may make information requests or ask inquiries.
5. Promote the company by showcasing Crave Corner's food, services, deals, and social media accounts on the website. Make it simple for customers to browse between the Home, Menu, About Us, Checkout, Inquiries, and Contact pages to ensure a user-friendly experience.
6. Gain the trust of your clients by giving them details about the company, its personnel, contact information, and business hours.

- Key performance indicators (KPIs)

KPI	What it measures	Target
Website Visitors	Number of people visiting the website	500+ visitors per month
Online Orders	Number of orders received through the website	50+ orders per month
Enquiries	Number of customer enquiries submitted	20+ enquiries per month
Menu Views	How often customers view the menu	300+ views per month
Conversion Rate	Percentage of visitors who place an order or make an enquiry	5–10%
Customer Satisfaction	How satisfied customers are with the website and service	80%+ positive feedback
Social Media Clicks	Number of visitors clicking social-media links	100+ clicks per month
Website Availability	How consistently the website is accessible	99% uptime

4. Proposed Website Features and Functionality for Crave Corner

Page	Essential Features	Functionality
Home Page	Business logo, slogan, welcome message, search bar, navigation menu, popular categories and featured food	Introduces Crave Corner and allows users to quickly navigate to important sections such as the Menu and Checkout.

Page	Essential Features	Functionality
About Us	Business history, mission, vision, team information and images	Helps customers understand who Crave Corner is, what the business offers and its values.
Menu	Food categories, food images, descriptions, prices and availability	Allows customers to browse meals, select items and add them to their order.
Checkout	Selected items, quantities, total price, customer details and delivery/pick-up option	Allows customers to review their order and submit it for processing.
Enquiries	Enquiry form, name, phone number, email, location and enquiry message	Allows customers to ask questions, request information or make special requests.
Contact Us	Phone number, email, WhatsApp, location, business hours and social-media links	Gives customers different ways to contact Crave Corner and find the business.

5. Designer and User Experience

- **Overall Design, Aesthetic and Branding**

The Crave Corner website will use a **modern, simple, and appetising design** that makes customers feel welcome and excited about the food. The design will focus on clear navigation, attractive food images, readable text, and an easy-to-use layout.

Overall, the design will create a **friendly, professional, modern, and food-focused identity** that represents Crave Corner and encourages customers to explore the menu and place an order.

- **Typography**

- **Colour Schem**

The main colours will be **warm and inviting colours** such as Carbon black, Dark brown, Charcoal, and white.

Black represents:

- Elegance
- Professionalism
- Confidence

- Modernity

Dark Brown represents:

- Warmth
- Comfort
- Richness
- Food and natural ingredients

White will be used to create contrast and improve readability.

Charcoal modernity, simplicity, and professionalism.

- **User Experience (UX) Considerations**

The Crave Corner website will prioritize providing a straightforward, understandable, and user-friendly customer experience.

- **Navigation Bar:** Users will be able to quickly navigate Home, Menu, About Us, Checkout, Inquiries, and Contact Us thanks to a clear navigation bar at the top of the page.

- **Simple Layout:** To make it easy for people to find what they need, information will be arranged into distinct parts.

- **Clear Buttons:** Buttons like "View Menu," "Order Now," "Checkout," and "Submit Inquiry" will make it obvious to users what must be done.

- **Simple-to-Read Text:** Information will be easier to understand with brief paragraphs, readable fonts, and clear headings.

- **Consistent Design:** The website's colours, typefaces, logo, and navigation will all be the same.

- **Simple Ordering:** Without needless steps, customers should be able to peruse the menu, choose a dish, check their order, and check out.

- **Contact Accessibility:** It will be simple to locate the phone number, email address, WhatsApp number, location, and company hours.

- **Mobile-Friendly Design:** The website should function well on PCs, tablets, and smartphones.

- **Visual Appeal:** Good food photos will improve the website's aesthetic appeal and aid consumers in understanding the products.

- **Accessibility:** The website will be simpler for various individuals to navigate if it has good colour contrast, detailed image alt text, and well labelled forms.

- **Quick Loading:** To ensure that page's load quickly, images and website content should be optimized.

-Error Prevention: When information is missing or inaccurate, forms should clearly state what is needed and offer helpful feedback.

- **Wireframes**

- Technical Requirements

The Crave Corner website will require basic web hosting, a suitable domain name, and web development technologies to ensure that the website can be accessed and maintained online.

Hosting Requirements

The website will require **web hosting** to store the HTML files, images, and other website resources.

Recommended hosting requirements:

- Reliable web hosting provider
- At least **1 GB storage** for the basic website
- **SSL certificate (HTTPS)** for security
- FTP/File Manager access
- Good server uptime
- Support for HTML, CSS and JavaScript
- Regular backups
- Ability to upgrade storage as the website grows

For a basic student project, **shared hosting** would be sufficient because the website does not require a powerful server.

Proposed domain name: Afrihost Domains

www.cravecorner.co.za

The **.co.za** extension is suitable because Crave Corner is a South African business.

Other possible options include:

- www.cravecorner.co.za
- www.cravecornerfood.co.za
- www.cravecorner.co

Programming Languages

The main programming languages for the website will be:

HTML5 – Used to create the structure and content of the website, including headings, paragraphs, images, navigation, forms and links.

CSS3 – Will be used in the later development stage to control colours, fonts, spacing, layouts and the overall visual appearance.

JavaScript – Can be introduced later to provide interactive functionality such as menu interactions, form validation, shopping-cart functionality and dynamic checkout features.

Frameworks and Tools

For **Part 1**, the website can be developed using basic HTML without a framework.

Possible technologies for future development include:

- **JavaScript** – For interactive website functionality.
- **Visual Studio Code** – Code editor used to develop the website.
- **Git** – Version control for tracking changes.
- **GitHub** – Repository for storing and managing the project.

7. Timeline and Milestones:

Date and Task:

- 10-14 Aug- Create a website using HTML, Basic HTML should be used, Navigation bars and no colour schemes, Business concept completed.
- 17-31 Aug- CSS styling, Website features identified, Colour schemes, Logos, Different type of fonts.
- 4-11 Sept- different screens, Website layout completed, Links, website testing, HTML Development.
- 14-18 Sept- Improvements, Errors corrected, Documentation, README completed, Submission, Project submitted.

8. Budget Estimate

Item	Estimated Cost
Website design & development	R5,000
. co.za domain – 1 year	R150
Web hosting – 12 months	R1,800
Website maintenance – 12 months	R3,600
Project delivery/setup	R500
Subtotal	R11,050
15% VAT	R1,657.50
Total including VAT	R12,707.50

Delivery Cost

The **R500 delivery/setup fee** covers the final delivery of the completed website project, including:

- Uploading the website to the hosting server
- Connecting the domain

- Final website testing
- Checking links and pages
- Handing over the completed project

Total Project Cost

Subtotal: R11,050

VAT (15%): R1,657.50

Grand Total: R12,707.50

Monthly/Annual Running Cost

After the initial development, the estimated ongoing costs would be approximately:

- **Hosting:** R150 per month
- **Maintenance:** R300 per month
- **Domain renewal:** approximately R100–R150 per year

This makes the budget realistic for a small South African food business while allowing for future website improvements.

1. **Organization Overview**

- **Name: Her Crown – Online Wig Ordering Website**
- **Brief History of Her Crown**

Her Crown is a planned hair and wig company that aims to give clients an easy way to peruse and purchase wigs online. The concept for Her Crown was created after observing the difficulties consumers encounter when placing hair product orders, primarily via phone calls and WhatsApp, including the need to manually confirm orders, wait for responses, and ask for product details. The organisation aims to combine beauty, convenience and technology by providing customers with an online platform where they can view different wig styles, prices and product information before placing an order. The development of the Her Crown website is intended to improve the overall customer experience while helping the business manage its products and orders more efficiently.

The name “Her Crown” represents the idea that hair can be an important part of a person's style, confidence and self-expression. The organisation therefore aims to create a simple and welcoming online shopping experience where customers can find a crown that suits their individual style.

- **Mission Statement**

Her Crown’s mission is to provide customers with a convenient, accessible and user-friendly online platform where they can easily browse, select and order quality wigs. The organisation aims to simplify the hair-buying process through technology while providing customers with a positive and reliable shopping experience.

- **Vision Statement**

Her Crown’s vision is to become a trusted and convenient online hair-shopping platform that empowers customers to confidently express their individual style while making wig shopping simple, accessible and enjoyable.

- **Target Audience**

Her Crown’s target audience is primarily individuals who are interested in purchasing wigs and other hair products online. The website is designed for customers who value convenience, easy access to product information, and a simple online ordering process.

The target audience includes:

- Young adults and adults interested in wigs and hair styling.
- Customers who regularly purchase wigs or hair products.
- Customers who prefer online shopping instead of ordering through WhatsApp or phone calls.
- Customers who want to compare different wig styles and prices before making a purchase.
- Customers who use smartphones, tablets, or computers to shop online.

The website will focus on providing a user-friendly experience that makes it easy for customers to browse products and place orders.

2. Website Goals and Objectives

- **Specific Goals for the Website**

The main goal of the Her Crown website is to create a convenient online platform where customers can browse and order wigs without relying primarily on WhatsApp or telephone.

The specific goals of the website are to:

Sell Products – Allow customers to browse available wigs, view prices and product information, and place orders online.

Improve Customer Convenience – Make the ordering process faster and easier by allowing customers to access products and place orders at any time.

Increase Online Visibility – Establish an online presence for Her Crown so that potential customers can discover the business and its products.

Generate Potential Customers – Encourage new customers to explore the available products and make enquiries or purchases through the website.

Provide Valuable Product Information – Display clear information about each wig, including its style, length, colour, price and availability.

Improve Order Management – Provide a structured way for the business to receive and manage customer orders compared with manually handling orders through WhatsApp and phone calls.

Create a User-Friendly Shopping Experience – Design a simple, attractive and responsive website that customers can easily use on smartphones, tablets and computers.

- **Key Performance Indicators (KPIs)**

The success of the Her Crown website will be measured using the following Key Performance Indicators (KPIs):

These KPIs will help Her Crown determine whether the website is successfully increasing online visibility, improving customer convenience, and generating wig sales.

KPI	What It Measures	Success Indicator
Website Traffic	The number of people visiting the website.	An increase in visitors over time.
Number of Orders	The number of wig orders placed through the website.	A consistent increase in online orders.
Conversion Rate	The percentage of website visitors who complete an order.	A higher percentage of visitors becoming customers.

Product Views	How many times customers view individual wig products.	High views indicate customer interest in the products.
Cart Activity	The number of customers who add products to their shopping cart.	More customers adding products to their carts.
Customer Enquiries	The number of customers requesting additional information.	Relevant enquiries that can lead to purchases.
Customer Satisfaction	How satisfied customers are with the website and ordering process.	Positive feedback and high satisfaction ratings.
Repeat Customers	The number of customers who return to make another purchase.	An increase in returning customers.
Website Usability	How easily customers can navigate and use the website.	Customers can browse products and complete orders without difficulty.

4. Proposed Website Features and Functionality

- **Essential Website Features**

The Her Crown website will include the following essential features:

- **Home Page**

The home page will introduce Her Crown and showcase featured wigs, promotions, and popular products. It will also provide clear navigation to other sections of the website.

- **About Us Page**

This page will provide information about Her Crown, its purpose, values, and the services it offers to customers.

- **Product Catalogue**

Customers will be able to browse the available wigs and view important information such as product names, images, prices, colours, lengths, and availability.

- **Enquiries**

Customers will be able to submit questions or enquiries through a contact form. The page will also display the business's demo contact information.

- **Search and Filter Function**

Customers will be able to search for specific wigs and filter products according to options such as price, style, colour, length or availability.

- **Shopping Cart**

Customers will be able to add their preferred wigs to a shopping cart, review their selections and adjust quantities before placing an order.

- **Order Confirmation**

After placing an order, customers will receive confirmation showing the details of their order.

- **Footer and Social Media Links**

The footer will contain important links, contact information, social media links, and basic business information.

5. Overall design choice

The combination of teal, blue, gold, cream and red creates a bold and contemporary colour scheme for the wig website. The darker colours establish professionalism and trust, while the gold and red create visual interest and draw attention to important elements. The cream colour balances the palette and provides a clean background for the website content. This colour scheme supports the brand identity by communicating confidence, beauty, individuality and luxury.

- **Topography**

- **Colour pallet**

The colour palette was carefully selected to give the wig website a modern, bold and stylish appearance while still keeping the website professional and easy to use.

- #086788 – Dark Teal: This colour represents confidence, trust and professionalism. It can be used for the navigation bar, headings or other important sections of the website.
- #07A0C3 – Bright Teal/Blue: This adds a more fresh, youthful and energetic feeling to the website. It can be used for buttons, links and interactive elements.
- #F0C808 – Yellow/Gold: This colour represents luxury, warmth and attention. Since wigs are associated with beauty and self-expression, the gold helps give the brand a premium feel.

- #FFF1D0 – Cream: The cream colour provides a soft and neutral background, making the website feel welcoming while improving readability and balancing the stronger colours.
- #DD1C1A – Red: Red adds energy, confidence and visual emphasis. It can be used sparingly for important buttons, promotions, sale labels or call-to-action sections.

Technical Requirements

Requirement	Description
Programming languages	HTML5 will be used to structure the website, CSS3 for styling and layout, and JavaScript for interactive features such as buttons, forms and product interactions.
Frameworks/Libraries	A framework such as Bootstrap can be used to make the website responsive and reduce development time.
Code editor	Visual Studio Code (VS Code) can be used to create and edit the HTML, CSS and JavaScript files.
Web browser	Google Chrome, Microsoft Edge or Mozilla Firefox can be used to test and preview the website.
Responsive design	The website should support desktop, tablet and mobile screen sizes.
Images	Product/wig images should be stored in an organised image folder and optimised so that they do not unnecessarily slow down the website.
Hosting	A web-hosting service is required to make the website available online. For a student project, options such as GitHub Pages or other affordable hosting services can be considered.
Domain name	A suitable domain such as www.[wigbrand].co.za could be registered to give the business a professional online identity

8. Budget

Item	Estimated Cost (R)
Website design and development	R6,500
Domain name (.co.za)	R180
Web hosting – 1 year	R1,200
Logo, graphics and branding	R500
Product/image preparation	R400
Website testing and optimisation	R500

Item	Estimated Cost (R)
Website maintenance – 1 year	R1,000
Delivery/transport costs	R300
Subtotal	R10,580
VAT (15%)	R1,587
Total Estimated Budget	R12,167
